Happy childhood & future opportunities for children in the township of Kibra

Many children here grow up under tough living conditions. Mostly with just one part of their parents, often with their grandparents, with neighbors or in the orphanage.

From his own painful experiences and extremely difficult childhood and school days, Yakub founded a school where all children are welcome and loved as they are - even if the parents cannot pay the school fees.

Learning at Watu Moja Lee Academy: Primary School

Compared to state schools children learn in relatively small classes (20-30 children).

The children share their school books, but have since 2018 access to the knowledge of an offline library and learn interactively with tablets thanks to the Swiss organization WiLearn4Life.

In January 2020 they were awarded as 'First Smart Learning Community in Kenya' with e-learning.

School house

To meet government requirements for the two-story school building, the previous wooden panel walls on the second floor of the school had to be built with bricks and two more toilets had to be added in 2019.

Yakub is happy for your support for ...

... contributions to the construction of the walls and toilets

... Wages for teachers & school management: 1050.- / month

(Wage costs for 1 trained teacher: 150.- / month)

Yakub welcomes people who support his school with a one-time or a regular monthly donation so that the children will continue to enjoy their place of “love & learning”

Please send any donations to the following Swiss bank account
