Hacked Wrap Top
Version

Seam Allowance

The original pattern has a 1.5cm seam allowance included for the Shoulder and Side seams to account for the French seams.
I reduced my seam allowance to 1cm as my wrap top will be fully lined.

Sleeve Shape

Instead of having the short dolman sleeves, I wanted something that had more movement and was not fitted around my arm. This shape creates more of a flutter cap style sleeve.

Waistband

Draw a line 3cm up from the base of the Bodice.

Cut along the line and discard the cut offs.

Measure the base of each Bodice.

For the Back Waistband, draw a rectangle the same width as the base of the Back Bodice and a height of 10cm.

For the Front Waistband, draw a rectangle the same width as the base of the Front Bodice and a height of 10cm.

Ties

The Ties form part of the Front Waistband, they are an extension of it.

The Tie length is up to you.

If, like me, you want to be able to wrap the ties right around your body and make a bow in the front you will need to extend the Front Waistband using this calculation:
 $(\text{Front Waistband length} \times 2) + 50\text{cm}$

Your Front Waistband/Tie pattern piece will likely be longer than the width of your fabric so you may need to work out where would be to have a join in the Tie. Maybe the Ties are made a separate pattern piece to the Front Waistband.
