

## How add a slit to a Circle Skirt

Tutorial by Hannah-Rose Smith

### Required measurements:

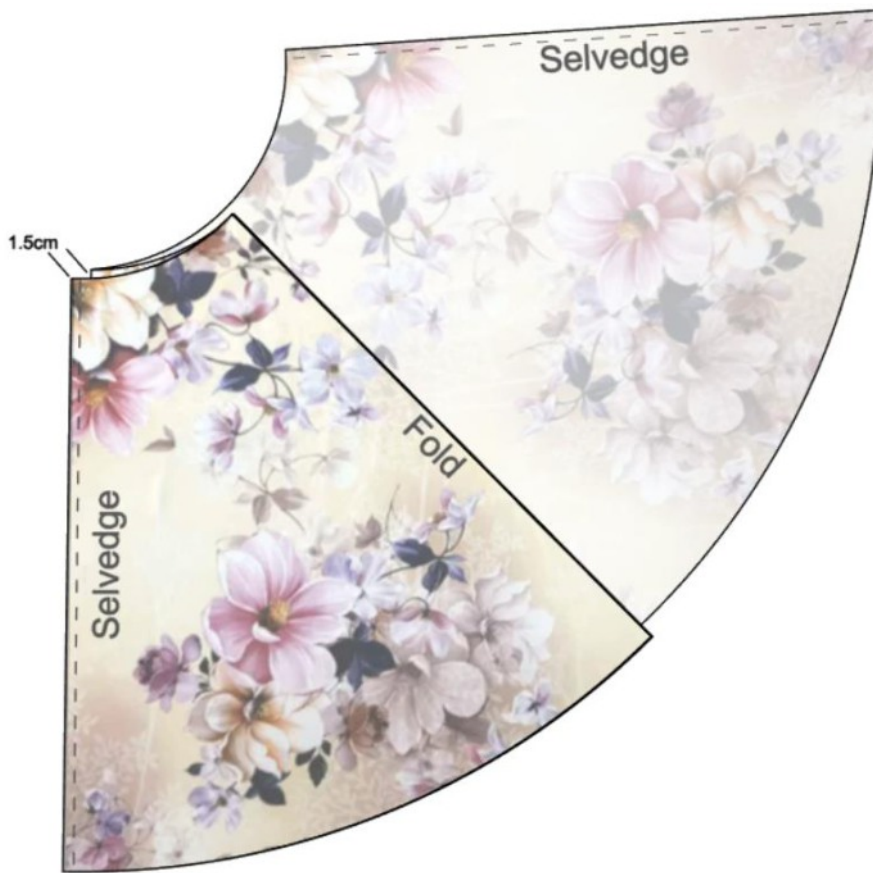

Above Slit measurement. The area between the Waist and the start of the Slit.

Work out roughly where you would like the slit to start then measure from your Waist to this point.

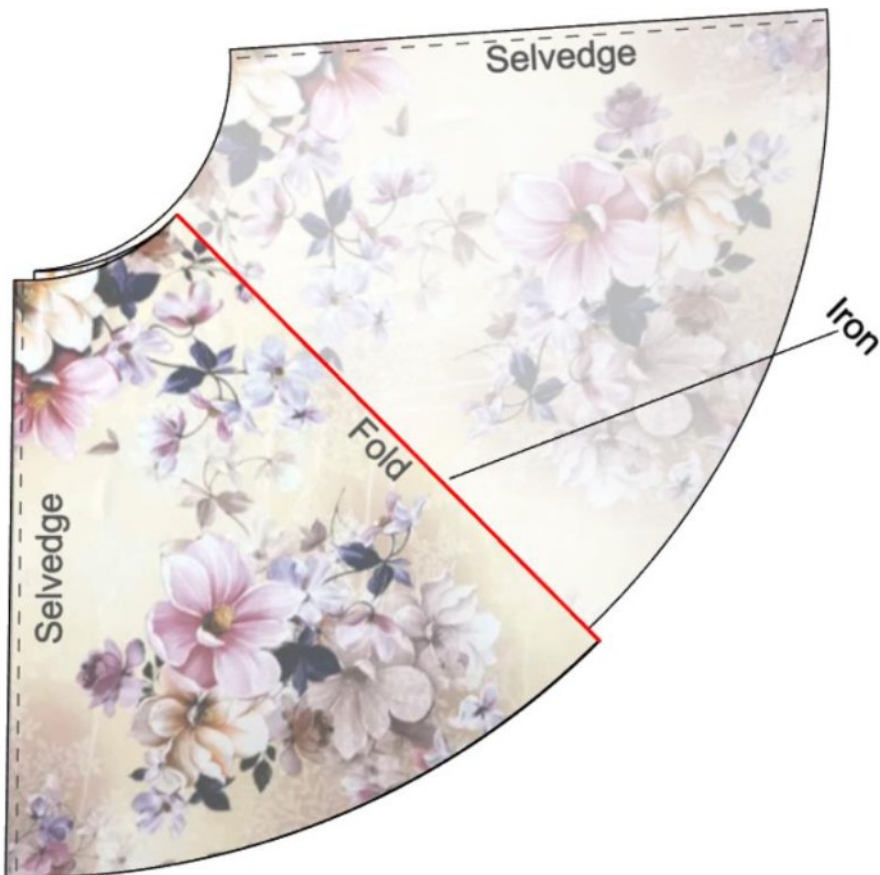

### How to add a slit to a Half Circle Skirt

1. Lay the Skirt flat on the floor and fold in half with the right-side up like in the image.

2. Fold again, this time bring the edge towards the fold and extend it past the fold by 1.5cm.

3. Iron this fold.

4. Measure down from the Waistline and along the ironed fold, the Above Slit measurement. Add 2cm to this measurement and make a mark.

5. Cut along the ironed fold until the mark.

Once opened back up and lying right side up, the Skirt will look like this. When worn, the Slit will be on your left leg. If you would prefer the slit on the other leg, simply fold the fabric in the opposite direction to the pictures in the steps above.
